

TESTING MODULE 🗣️ MODULE 1: SOYBEAN VALUE ADDITION

HOW TO USE THIS ON YOUR WEBSITE

Learn how to turn soybeans into income through simple processing methods like soy flour and soy milk. Start small and grow into a business.

On the Module 1 page:

Structure it like this:

1. Audio Player (MAIN CONTENT of the module)

Upload the recording here

One in English

One in a local language

2. Short Summary (3–4 lines)

📄 “Learn how to turn soybeans into income through simple processing methods like soy flour and soy milk.”

3. Key Points (bullets)

4. Practical Steps (soy flour / milk)

5. Assignment (community validation)

6. Submit button (Google Form / WhatsApp)

Perfect—this is where we turn your module into something **clean, structured, and ready to paste directly onto your website.**

I'll format this exactly like a **real webpage section** (mobile-friendly, simple, interactive).

🗣️ MODULE 1 PAGE (WEBSITE-READY CONTENT)

Agriculture Training Modules

Module 1: Soybean Processing & Value Addition

🎯 What You Will Learn

By the end of this lesson, you will:

- Understand why processing soybeans increases income
 - Learn how to make simple soybean products
 - Identify business opportunities in your community
-

Introduction

Soybeans are a valuable crop.
But many farmers sell them in raw form at low prices.

 Processing soybeans helps you:

- Earn more income
- Reduce waste
- Improve nutrition at home
- Create small business opportunities

In this lesson, you will learn simple ways to turn soybeans into useful products.

Listen to the Lesson

 *(please Insert the audio player here – English version)*

 *(please Insert your audio player here – Local language version)*

Key Points

- Raw soybeans sell at low prices
 - Processed products have higher value
 - You can start small with simple tools
 - Soybeans can be turned into food and business products
 - Understanding your market is very important
-

Practical Learning: Soybean Processing

Why This Matters

In this section, you will move from learning to **doing**.

 Processing soybeans is not just theory it is a **practical skill** that can help you:

- Increase your income
- Improve food for your family
- Start a small business

Instead of only reading, you will learn **by practicing simple methods** that you can try at home or in your community.

Choose What You Want to Practice

You do not need to do everything at once.
Start with **one option** that is easiest for you.

 You can choose:

- **Soy Flour** → Easy to start, long shelf life
- **Soy Milk** → High demand, good for daily sales

 **Tip:**

Choose based on:

- What tools you have
- What people in your community need
- What you feel confident trying

Your Goal

By the end of this section, you should:

- Understand the steps clearly
- Choose one product to try
- Be ready to take your first step in processing

Then continue with:

☐ **Option 1: Making Soy Flour**

☐ **Option 2: Making Soy Milk**

☐ **Option 1: Making Soy Flour**

☐ **Steps:**

1. Clean soybeans (remove stones and dirt)
2. Soak in water (8–12 hours)
3. Boil for 20–30 minutes
4. Dry completely (sun-dry)
5. Roast lightly
6. Grind into flour

✓ Uses:

- Porridge
- Baking
- Baby food

☐ Option 2: Making Soy Milk

☐ Steps:

1. Soak soybeans overnight
2. Remove skins
3. Grind with clean water
4. Boil the mixture
5. Filter to remove residue

✓ Optional:

- Add sugar or flavor

✓ Uses:

- Drink at home
- Sell in your community

💡 Income Opportunity

Processing soybeans can help you earn money.

☞ You can:

- Sell soy milk daily
- Package and sell soy flour
- Supply to schools or local markets
- Work in groups to produce more

💬 Start small:

Even 5–10 customers can grow into a business.

🌐 Think About Your Market

Before you start, ask:

- Who will buy my product?
- What product is most needed in my area?
- How much are people willing to pay?

☞ Understanding your market helps you avoid losses.

☐ **Common Challenges**

You may face:

- Lack of equipment
- Limited knowledge
- Difficulty finding customers

☞ Solution:

Start small, learn, and improve step by step.

☐ **Your Task (Assignment)**

🎯 **Choose ONE:**

☞ **Option 1:**

What soybean product would you like to make?
(Example: soy milk or soy flour)

☞ **Option 2:**

Talk to at least **2 people** in your community.

Ask them:

- Would you buy soy milk or soy flour?
- Which one do you prefer?

✉ **Submit Your Response**

☞ *(Insert button: “Submit Assignment” – link to Google Form or WhatsApp)*

💬 **Quick Feedback**

☞ Was this lesson helpful?

- Yes
- No

☞ What was difficult to understand?

☞ Would you try soybean processing?

- Yes
- No
- Maybe

✔ **Mark as Complete**

☞ *(Insert button: “Mark Module as Complete”)*

DESIGN TIP (VERY IMPORTANT)

When you paste this into your website (Wix):

- Keep sections short (2–4 lines max)
 - Use icons or emojis (🔗 ✎ ☐)
 - Add buttons after every major section
 - Make sure audio is easy to play
-
